

SPP staff will be performing the OASIS system cutover and will require an outage of the SPS OASIS. The outage will occur Wednesday night between 1:00 AM and 6:00 AM CDT, June 24, 2009. The OASIS system is expected to be unavailable for 5 hours. Please make every attempt to submit any requests for service prior to the outage time stated.

During the outage, requests will be accepted by fax. Please ensure that you have a current version of the fax request form printed and available prior to the outage. The form is available on the SPP OASIS or click [here](#) to go to the current version. It is pertinent that you print this out prior to the outage since the OASIS system will be unavailable during the outage. The fax number is 806-640-6349. If you have any questions or concerns contact the 24-hour desk at 806-640-6343.
