

GI Queue Column Changes and Enhancements – Effective 8/26/2015

Effective 26 August 2015, Southwest Power Pool, Inc. (“SPP”) made changes to the Generation Interconnection Queue data tables to reflect both the Initial Queue Position (GEN #) alongside the newly created Interconnection Facility Study Queue Position (IFS #). The addition of the IFS Queue Position and column is consistent with requirements under the SPP Tariff Attachment V, Generator Interconnection Procedure, Section 4.1.2 regarding queue position. The assignment of an IFS Queue Position signifies that the Generation Interconnection request (GEN #) has met the requirements to advance to the Facilities Study stage.

The Active Request GI Queue Data Table may be viewed at this URL:
